

## Andisil® 2827-186L

## TYPICAL PROPERTIES\*

CHEMICAL NAME	1,3-Divinyl tetramethyl disiloxane
APPEARANCE @ 25 °C	Clear, water-white liquid
PURITY	99.0%
BOILING POINT, °C	139 °C
FLASH POINT, °C	19 °C

\* These properties are not intended to be used as specifications but only as suggested characteristics

## DESCRIPTION

Andisil® 2827-186L is a high purity 1,3 - Divinyl Tetramethyl Disiloxane that is used as a linear inhibitor in the formulating of two-part Silicone RTV-2 Addition- Curing systems. Because of the large vinyl content (10.75 mmole/gm), small amounts are very effective in retarding and controlling the working time or pot life of two-part Addition-Curing Silicone RTVs. Also, due to its boiling point of 139 °C, it is easily volatilized during curing. It is recommended that tests be performed to determine the exact quantity of Andisil® 2827-186L used in a formulation to customize the working time one requires. A suggested starting formulation is to use 0.25 to 0.50 parts by weight of the Andisil® 2827-186L with 100 parts of the Base polymer containing the platinum catalyst.

## STORAGE &amp; SHELF LIFE

The shelf life, when the container is stored unopened and under proper conditions at room temperature, is expected to be a minimum of twelve months. It is recommended to ground the container when pouring or weighing a quantity into another container or vessel to eliminate the chance of a static discharge.

## PACKAGING

Andisil® 2827-186L container options are available upon request.

For additional information on the product, please contact your Sales Representative.
